ANIMAL DISEASE  
DIAGNOSTIC  
LABORATORY

## MISSION

To aid in the prevention, control, and eradication of animal diseases for the State of Indiana, to provide prompt and accurate diagnostic services, and to add to the wealth of the state by working with local, state, federal, and international partners to meet current and future needs.

## Strategic Goals:

**Goal 1:** To provide the State of Indiana and the Nation with exemplary diagnostic services that are prompt, accurate, and cost-effective, utilizing highly-trained and motivated personnel using state-of-the-art equipment and facilities.

**Goal 2:** To disseminate knowledge and provide expertise to veterinarians, veterinary professional students, veterinary technicians, the public, and diagnostic professionals in the recognition and diagnosis of animal diseases for Indiana and the Nation.

**Goal 3:** To develop and validate diagnostic tests that are needed by Indiana and the veterinary community at large, to use state-of-the-art techniques to improve on existing testing methods, and to discover new diagnostics for novel and emerging infectious, toxic and nutritional diseases.

**Goal 4:** To have a collegial, stimulating workplace with recognition and support of diversity.
